Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

Applicant amendment of 1-07-07 added new claims 20 – 24 and canceled claims

1 - 19.

Currently, claims 20 - 24 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 20 - 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Burge (US 6,014,638).

Regarding claim 20 and related claim 24, Burge teaches a device and method for operating a computing device to allow a user to interact with network sites over a network interface, the method comprising:

initiating operation of user interface software on said computing device;

automatically configuring said user interface software using a set of stored preference

information, said preference information including a ranking of preferred ones of said plurality of network sites, said ranking previously established based on characteristic information automatically measured based on previous network activity of said user; operating said user interface software to interact with a plurality of network sites', updating said characteristic information based on said detected network activity, said characteristic information including information identifying the duration and frequency of visits to each of said plurality of network sites; and updating said preference information based on said updated characteristic information to automatically reconfigure user preferences of said user interface (see at least Abstract, Col 1, lines 7 – 16, Col 3, lines 1 – 17, Col 5, lines 50 – 67, Col 6, lines 1 - 8 and Figure 2B).

Regarding claim 21 (New), Burge teaches a computing device, wherein said characteristic information further includes information identifying at least one of:

- (i) a network site with the greatest frequency of visits by said computing device;
- (ii) a network site having the greatest time spent by said computing device (Col 8, lines 41 – 42); (iii) a network site having the greatest number of downloads by said computing device; (iv) a network site for which said computing device selected the largest window size; and (v) a network site having the greatest number of keystrokes interaction by said computing device.

Art Unit: 3625

Regarding claim 22 (New), Burge teaches a computing device, wherein said preference information further stores at least one alternative network site for at least one of said ranked network sites (Col 9, lines 17 – 25).

Regarding claim 23 (New), Burge teaches a computing device, wherein said network activity is detected by monitoring at least one of (i) a time spent at a network site; (ii) a frequency of communications with a network site; (iii) a number of downloads from a network site; (iv) a window size while in communication with a network site; (v) a number of keystrokes while in communication with a network site Col 6, lines 50 – 67).

Response to Arguments

Applicant's arguments with respect to claims 20 -24 have been considered but are moot in view of the new ground(s) of rejection. The new art is Burge (US 6,014,638).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3625

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
